

Export of Pet Food to Singapore

Pet food containing bovine ingredients (except milk or protein-free tallow*) is prohibited unless the bovine ingredients are of Australian or New Zealand origin.

Pet food must be exported on a VS Form 16-4 with one of the following certifications:

"Certified materials do not contain mammalian proteins of bovine origin (except milk)."

Or

"Certified materials do not contain mammalian proteins of bovine origin (except milk). Certified materials may contain protein-free tallow* (maximum level of insoluble impurities of 0.15% in weight.)"

Or

"The bovine ingredients (except milk and protein-free tallow*) in the pet food are derived only from animals in Australia/New Zealand."

*NOTE: Certification regarding protein-free tallow must be supported by lab results for the specific product (lot/containers) being exported.

Other certification requirements have not been determined.
