

EU ad hoc Group’s “Assessment for OIE Listing of Koi Herpesvirus Disease (KHVD)” by the ad hoc Advisory Group (Finfish Subgroup) to the OIE Fish Disease Commission

The United States concurs with the findings of the Finfish Subgroup’s review of the document compiled by the EU ad hoc Group – “Assessment for OIE Listing of Koi Herpesvirus Disease”. We agree that Koi Herpesvirus Virus (KHV) does not meet the criteria to be an OIE listed disease based on issues such as the robustness of available diagnostic tests, the inability to detect a carrier state and wide spread distribution of the pathogen.
