### NURSERY STOCK DEFINITION

Nursery Stock means any hardy tree, shrub, plant, or bulb, whether wild or cultivated, except turfgrass, any cutting, graft, scion, or bud thereof (Ohio sales).

### GENERAL SHIPPING REQUIREMENTS

Any nursery stock shipped into Ohio must be accompanied by a tag or poster bearing an exact copy of a valid license of certificate of inspection and be free of plant pests. Each individual piece of nursery stock, or sales unit, consigned to a retail outlet must be labeled with a complete, correct botanical or approved common name.

Ohio does not require the filing of individual licenses for out-of-state nurseries so long as the office is provided with an annual list of certified nurseries from the shipping state.

### NOXIOUS WEEDS

#### NOXIOUS WEEDS BY STATUTE:

*Rosa multiflora*.....Multiflora rose
