I. SHIPMENT INFORMATION

Name and address of consignor (exporter): _____

Name and address of consignee importer): _____

Product description and identification (animal species of origin of raw materials; brand and product names; use continuation page if needed): _____

Quantity of product (e.g., net weight/#of packages): _____

Port of export: _____

II. VETERINARY ATTESTATIONS

I, the undersigned full time salaried veterinarian of the United States Department of Agriculture, hereby certify the following: *(check all applicable boxes)*

The shipment includes pet food, treats, or compound chews with bovine ingredients and these products were manufactured with:

U.S. origin bovine ingredients (cattle, bison, buffalo or exotic bovine such as élan, kudu) which do not contain any of the following tissues considered to be specified risk materials (SRMs): the skull, brain, eyes tonsils, trigeminal ganglia, spinal cord, dorsal root ganglia, and vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae and the wings of the sacrum) from bovine animals aged 30 months or older and the distal ileum from bovine of all ages.

Certified bovine material which originated from a country recognized by the CFIA as negligible risk for BSE. (Argentina, Australia, Finland, Iceland, New Zealand, Norway, Paraguay, Singapore, Sweden and Uruguay)

Bovine ingredients which originated in Canada.

The shipment includes pet food, treats or compound chews with no bovine ingredients (including bovine SRMs) or no bovine ingredients except as noted below: (check as applicable)

- milk or dairy ingredients;
- protein free tallow (maximum level of insoluble impurities of 0.15% in weight);
- rawhide.

The certified pet food/treats/compound chews were manufactured: **(check applicable box):**

In a dedicated facility that does not receive, process or store any bovine SRMs or bovine ingredients that contain SRMs: the skull, brain, eyes tonsils, trigeminal ganglia, spinal cord, dorsal root ganglia, and vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae and the wings of the sacrum) from bovine animals aged 30 months or older and the distal ileum from bovine of all ages.

On a dedicated line from receipt of raw material to final packaging and storage with no risk of cross contamination with any bovine SRM derived tissues. **[NOTE: If the facility has ineligible materials on the premises, all pet foods for export to Canada must be produced on a totally dedicated line.]**

The pet food products, subject of this shipment, were sufficiently processed to assure the destruction of microbiological pathogens.

Precautions have been taken to avoid recontamination of the product with pathogenic agents after heat treatment.
