

Export of Products with Minor Dairy or Egg Components into Jamaica

“Minor dairy” products containing small quantities of milk (e.g., chocolate, cookies) or egg products (e.g., mayonnaise) require veterinary certification by APHIS VS. These products should be certified with a VS form 16-4 with no additional declarations.

Since an original agreement with Jamaica dating back to 2002, VS has not agreed to provide VS forms 16-4 with additional statements and these should not be issued for such products.
